As quickly as the way we work is changing, so are the expectations and roles of a supervisor. An associate degree in Leadership and Organizational Development from Moraine Park Technical College can give you the skills you need to navigate a rapidly changing workplace.

About the Program

While technology, diverse workplaces and a host of other factors may be changing the way we work, one thing remains the same: supervisors have a crucial role in ensuring employees understand company policies and meet goals.

The Leadership and Organizational Development associate degree prepares new and current supervisors to meet the demands of a changing workplace as they learn how to become a better leader. Designed for working adults, this leadership and organizational development program is offered in an accelerated format, with each six-week class meeting once a week for four hours.
