
ACADEMIC ADVISING POLICY

Moraine Park Technical College assigns an academic advisor for every student accepted into an associate degree, technical diploma or certificate program. The College employs professional advisors to work in partnership with the academic affairs unit and other student services departments to assist students with academic and non-academic issues that may hinder their retention and/or completion. Students are to meet with their advisor prior to each term's registration to review progress, for graduation, and transfer advising.

Advisor assignments are made based upon program and campus location, including online. Moraine Park Technical College does not discriminate on the basis of race, color, national origin, sex, disability, or age in employment, admissions, or its programs or activities.
